

Hi, Hope you are doing well.

I am waiting below response. Can we will get one chance to show/prove our epub conversion skills ?

Looking forward hearing from you.

Thanks [Name ommitted]

=====

Can you give me a price quote and a time frame to convert this book?

[Download link for complex source file ommitted.]

GF

=====

Hi Gary,

Please can you send me the file once more. I am unable to access this link.

Looking forward hearing from you

=====

Here, try this:

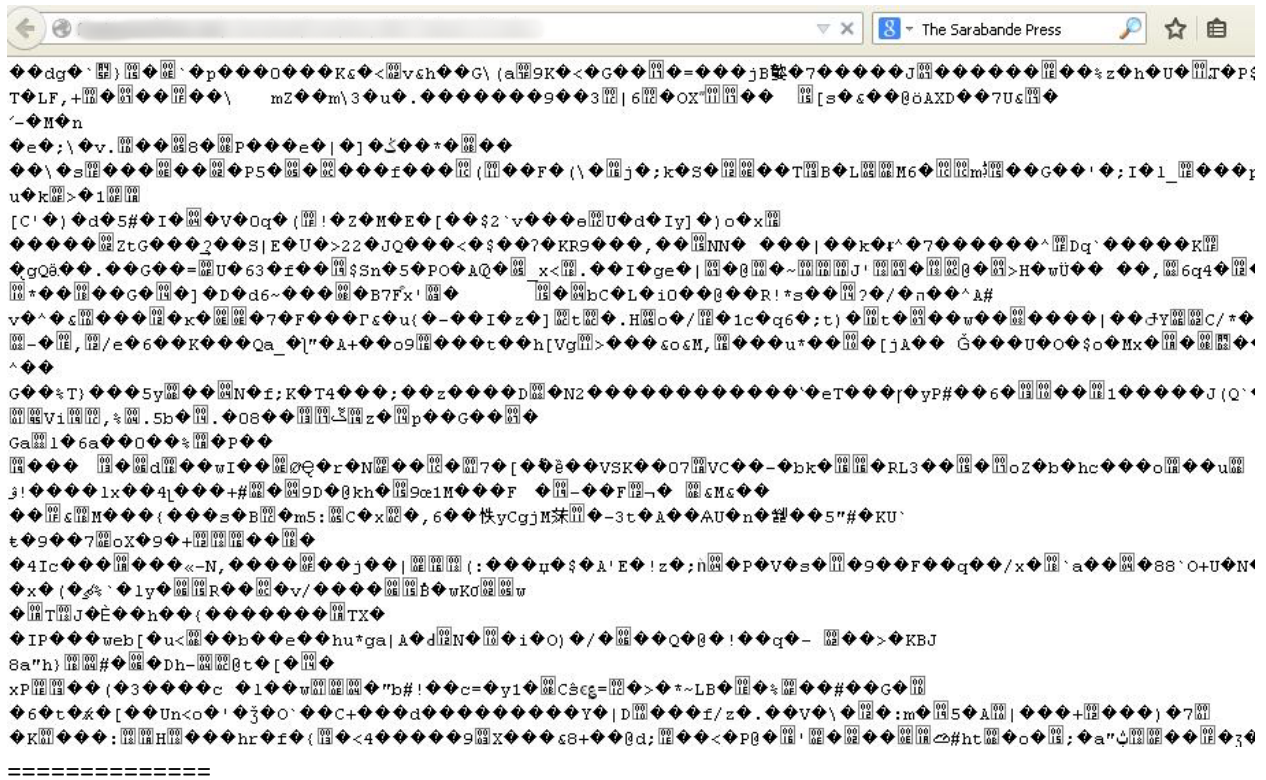

[Spaces in URL replaced with %20's]

GF

=====

See attached Screenshot

All is showing Garbage character.

That's because your browser is trying to render the file instead of download it. Try right-clicking on it.

Are you sure you're experienced in the computer business?

GF

=====

Yes.

I just shared one DROP BOX folder. Please check your mail box and put your files.

=====

Seriously, dropbox isn't necessary. Right-click on the link I sent you, choose either "Save As..." or "Save Target As..." and then specify where on your hard disk you want it to be. Then double-click on the file once it's finished downloading. GF

=====

See attached. I did tried few times.

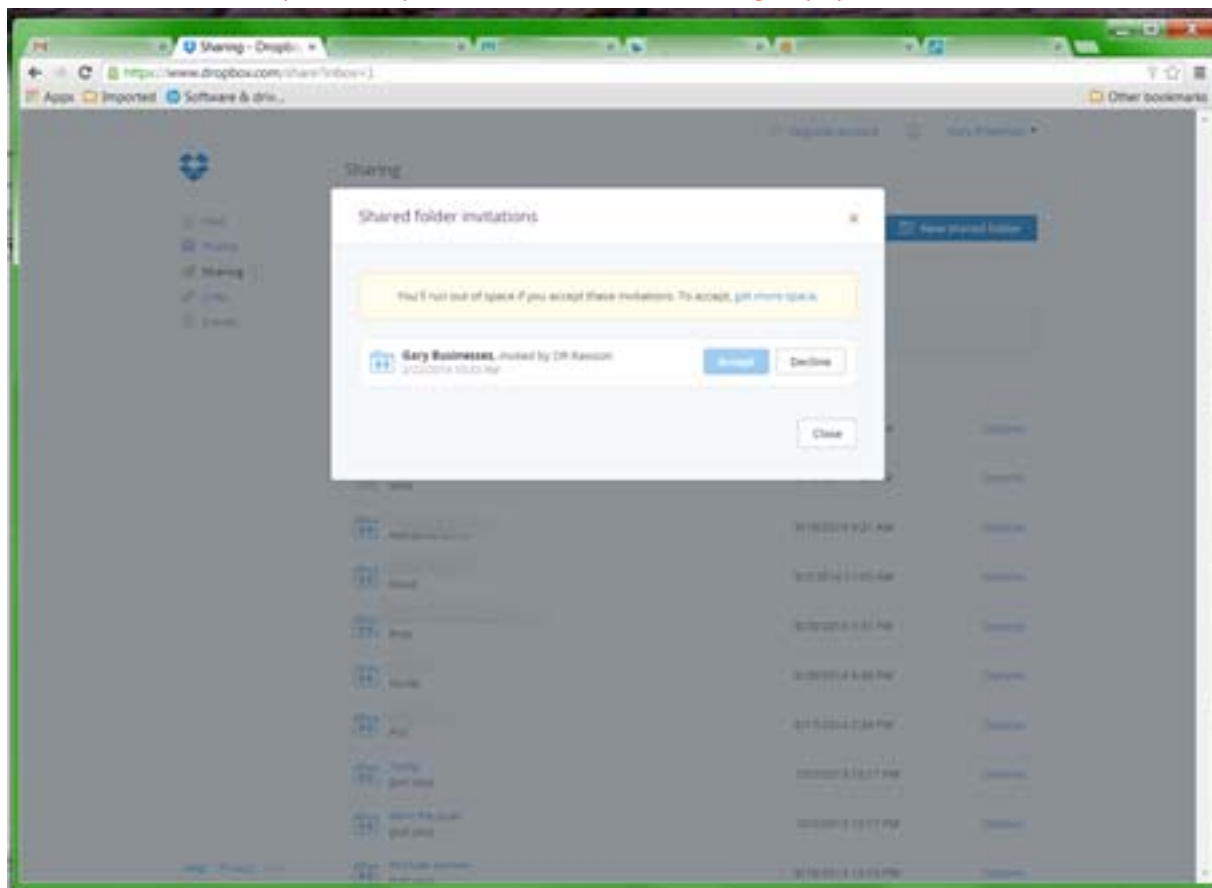

But showing huge bytes.

May be you can check your location path.

Please can you put the file inside the Dropbox folder.

=====

See below. I can't accept the dropbox invitation without having to pay them more:

---

Hey Gary, Good morning!

Thanks for trying.

Seems your file is huge byte. That's why Dropbox is telling "You'll run of space if you accept these invitation."

So best option you send me your FTP details - Put the files and shared to me.

Thanks

---

[At this point I decided this is not a good use of my time.]
